Free Ranging Dogs And Wildlife Conservation:

Free-Ranging Dogs and Wildlife Conservation Matthew E. Gompper, 2014 This edited volume adopts a global perspective to review how dogs interact with wildlife how humans perceive these interactions the potential importance of dog wildlife interactions and the scope of the problems *The African Wild Dog* Joshua Ross Ginsberg, David Whyte Macdonald, IUCN/SSC Canid Specialist Group, 1997 Over the last 30 years the African wild dog population has declined dramatically Dogs have disappeared from 25 of the 39 countries where they were previously found and only 6 populations are believed to number more than 100 Today it is believed that only between 3 000 5 500 dogs remain in 600 1 000 packs with most to be found in eastern and southern Africa The dramatic reduction in their population is attributed to a number of factors including human population growth and activities deterioration of habitat and contact with domestic dogs and their diseases This Action Plan explores some of the reasons behind their disappearance and provides a number of proposed solutions split into 3 priority areas ranging from habitat management and conservation to monitoring domestic dogs

Disease Ecology of Free-ranging Dogs in Central India Aniruddha Belsare, 2013 I obtained baseline demographic and epidemiologic data for village dog populations around a protected area in central India with the objective of evaluating the risks dog populations present to sympatric wild carnivores Demographic surveys indicated that dogs occurred at high densities in the study villages 526 dogs per km² Epidemiological surveys documented a high prevalence of exposure to three pathogens of conservation concern canine parvovirus CPV canine distemper virus CDV and canine adenovirus CAV An in depth analysis of the epidemiological data indicated that these pathogens actively circulate in the dog populations and therefore pose a significant threat to susceptible wild carnivore species in the region The finding that foxes with ongoing or recent CDV infection had a high mortality rate further supported this conclusion Study findings also suggest that most adult dogs in the population are immune to these pathogens and play no current or future role in the maintenance or transmission of these pathogens Unsurprisingly the village level vaccination experiment indicated that vaccine based management of enzootic pathogens in large free ranging dog populations would be ineffective and unnecessary as much of the effort is put into vaccinating dogs that are already antibody positive thus protected I used a modeling approach to explore and contrast potential disease control strategies This work highlights the use of an approach combining data from ecological and epidemiological studies of free ranging populations with model explorations to better understand disease threats and identify potential disease management interventions **When Dogs Run Wild** Christine Gentry, 1983 *The Formation of New Reproductive Units in Free-ranging African Wild Dogs (Lycaon Pictus)*

Evelyn Kimberly McCreery, 1999 *The African Wild Dog* Scott Creel, Nancy Marusha Creel, 2002-06-09 This book is based on a six year study of African wild dogs *lycaon pictus* in Tanzania's Selous Game Reserve the largest protected area in Africa and one of the least studied *African Wild Dogs* Brendan Whittington-Jones, 2015 450 is optimistically the number of free ranging African wild dogs left in South Africa If ever

a charismatic African species could be considered an underdog in the face of human development the wild dog *Lycaon pictus* is it Available habitat is in short supply An abundance of fences and roads cut the landscape They are loved They are despised The immediate future of this dynamic endangered large carnivore is in the hands of a thinly spread intensely committed network of conservationists donors state reserves and progressive landowners When an opportunity to study wild dogs through the Endangered Wildlife Trust presented itself to Brendan Whittington Jones in 2007 he arrived in Hluhluwe iMfolozi Park naive to the challenges of real wildlife conservation The next seven years were a flood of lessons in the complexity and fascination of wild dog management anger management Microsoft Office diplomacy optimism and how to play wild dog travel agent The camaraderie of the unconventional crew of devoted field staff and researchers who dedicate so much to keep the species running was a revelation This book lifts the gloss and illusion off a wedge of carnivore conservation and reveals a snapshot of characters human and canid and organisations which tread the murky waters of trying to ensure the species persistence in South Africa There is only hope through action and remembering a cold beer at sunset and good bloody laugh can restore a little sanity Back cover

The Social Ecology and Behavior of Free-ranging Dogs Thomas John Daniels,1987 **Proceedings - Vertebrate Pest Conference** ,2000 **Canids** Claudio Sillero-Zubiri,Michael Hoffmann,David Whyte Macdonald,2004 The new Canid Action Plan synthesizes the current knowledge on the biology ecology and status of all wild canid species and outlines the conservation actions and projects needed to secure their long term survival Aiming at conservation biologists ecologists local conservation officials administrators educators and all others dealing with canids in their jobs the authors aspire to stimulate the conservation of all canids by highlighting problems debating priorities and suggesting action **Scientific Report ...** Serengeti Wildlife Research Centre,1990 **Wildlife Research** ,2015 **The Impact of Uncontrolled Dogs on Wildlife and Livestock** Richard N.
