Basics Architecture 01: Representational Techniques Lorraine Farrelly, 2008-01-08 *Basics Architecture 01 Representational Techniques* by Lorraine Farrelly explores the concepts and techniques used to represent architecture. It describes a broad array of methodologies for developing architectural ideas ranging from two and three dimensional conceptual sketches through to the working drawings required for the construction of buildings and offers a range of practical drawing methods showing how to present and plan layouts, make conceptual sketches, work with scale, use collage and photomontage to create contemporary images, along with techniques to prepare and plan design portfolios. The book also deals with a variety of media from those used in freehand sketching through to cutting edge computer modeling and drawing techniques. Using examples from leading international architects and designers along with more experimental student work, a broad range of interpretations, possibilities and applications are demonstrated. Students and practitioners will find this a useful and clear companion to a vital aspect of architectural design.

Design Graphics, 2006 This unique book emphasizes hand drawing as a design skill, demonstrating this drawing as a mental as well as a physical exercise. Utilizing this book will enable the practitioner to make design decisions on paper faster and easier and will let them know how visual communication with clients can provide better, more economical design solutions. Practical, straightforward and reader friendly, this book covers such topics as sketching, line, light, texture and materials, design drawing including the 5 step bubble flow and conceptual doodles, diagrams and perspective and rendering techniques including 1pt and 2pt eyeball methods, overlay method and entourage. An excellent refresher for professional designers and architects as well as a primer for those employed in any related field.
