REWIND STARTERS

On some engines, the rewind starters are attached to the starter housing with screws and can be quickly removed.

Other starters are bolted or spot welded to the starter housing and must be drilled to remove, following the procedures below. For installation, screws and nuts are available separately from the Illustrated Parts List and are included with complete replacement starters.

Figure 1

1. Carefully drill through all fasteners and remove rewind starter. Do not allow drill bit to cut into the holes in the starter housing.

NOTE: Do not attempt to spin out the nuts while the starter is still on the engine. The nuts are made of steel and the shavings will collect on the flywheel magnets.
