Handbook of Model Predictive Control Saša V. Raković, William S. Levine, 2018-09-01 Recent developments in model predictive control promise remarkable opportunities for designing multi input multi output control systems and improving the control of single input single output systems This volume provides a definitive survey of the latest model predictive control methods available to engineers and scientists today The initial set of chapters present various methods for managing uncertainty in systems including stochastic model predictive control With the advent of affordable and fast computation control engineers now need to think about using computationally intensive controls so the second part of this book addresses the solution of optimization problems in real time for model predictive control The theory and applications of control theory often influence each other so the last section of Handbook of Model Predictive Control rounds out the book with representative applications to automobiles healthcare robotics and finance The chapters in this volume will be useful to working engineers scientists and mathematicians as well as students and faculty interested in the progression of control theory Future developments in MPC will no doubt build from concepts demonstrated in this book and anyone with an interest in MPC will find fruitful information and suggestions for additional reading [Intelligent Integrated Energy Systems](#) Peter Palensky, Miloš Cvetković, Tamás Keviczky, 2018-10-26 This book presents research results of PowerWeb TU Delft s consortium for interdisciplinary research on intelligent integrated energy systems and their role in markets and institutions In operation since 2012 it acts as a host and information platform for a growing number of projects ranging from single PhD student projects up to large integrated and international research programs The group acts in an inter faculty fashion and brings together experts from electrical engineering computer science mathematics mechanical engineering technology and policy management control engineering civil engineering architecture aerospace engineering and industrial design The interdisciplinary projects of PowerWeb are typically associated with either of three problem domains Grid Technology Intelligence and Society PowerWeb is not limited to electricity it bridges heat gas and other types of energy with markets industrial processes transport and the built environment serving as a singular entry point for industry to the University s knowledge Via its Industry Advisory Board a steady link to business owners manufacturers and energy system operators is provided [The Art of Error Correcting Coding](#) Robert H. Morelos-Zaragoza, 2006-08-21 This text provides introductory material offering examples of decoding algorithms of practical classes of error correcting codes implemented in C language and provides examples of the most popular decoding algorithms [Dependable Software Engineering. Theories, Tools, and Applications](#) Xinyu Feng, Markus Müller-Olm, Zijiang Yang, 2018-08-25 This book constitutes the proceedings of the Third International Symposium on Dependable Software Engineering Theories Tools and Applications SETTA 2018 held in Beijing China in September 2018 The 9 full papers presented together with 3 short papers were carefully reviewed and selected from 22 submissions The purpose of SETTA is to provide an international forum for researchers and practitioners to share
