Finance Policy for Renewable Energy and a Sustainable Environment Michael Curley, 2014-03-18 This book explains how environmental projects and improvements are achieved through the imposition of regulations on the one hand and financial incentives on the other. It discusses how those incentives can be organized to achieve the greatest environmental benefits at the lowest possible cost to the public. It presents the best environmental finance policies for the financing of alternative energy projects so that the ultimate cost of delivered power will decline. It also examines the challenges of the next generation of environmental programs.

Ecologies of Learning: An Edited Volume on Sustainability in Education 2025 Editor: 1 DR. DIVYA SHARMA Editor: 2 DR. SHALINI VERMA Editor: 3 DR. SUMITA SINGH 4. DR. PUSHPA SHARMA, PREFACE As humanity confronts unprecedented ecological challenges, education emerges as both a beacon of hope and a catalyst for change. *Ecologies of Learning: An Edited Volume on Sustainability in Education* brings together diverse perspectives, empirical insights, and practical strategies to reimagine how schools, universities, and learning communities can nurture environmental stewardship and social equity. This volume transcends traditional pedagogies by framing sustainability not merely as content to be covered but as a lens through which every aspect of teaching and learning is reexamined. The fifteen chapters chart a comprehensive trajectory from foundational theories of environmental pedagogy to cutting-edge innovations that will shape classrooms of 2030 and beyond. We begin with core principles (Chapter 1) and curriculum design frameworks (Chapter 2) that establish eco-literacy as a dynamic interdisciplinary endeavour. Subsequent chapters delve into place-based models (Chapter 3), the integration of Indigenous knowledge systems (Chapter 4), and STEM approaches that align scientific inquiry with planetary stewardship (Chapter 5). Recognizing the power of the arts to convey complex ecological narratives, Chapter 6 explores arts-based methodologies that cultivate empathy and systems thinking. Experiential fieldwork (Chapter 7) and digital tools (Chapter 8) offer complementary avenues for learners to engage both physically and virtually with environmental issues, while Chapter 9 presents assessment strategies designed to capture real-world impact and behavioural change. Preparing educators

themselves for this change in basic assumptions Chapter 10 outlines transformative approaches to teacher training and Chapter 11 addresses equity and access to ensure that eco pedagogy benefits all learners Chapters 12 and 13 bridge theory and policy highlighting effective school community partnerships and the frameworks needed to sustain green schools at scale Building on these foundations Chapter 14 presents case studies from urban and rural settings illustrating contextualized practices that empower learners as change agents Finally Chapter 15 looks forward spotlighting innovations from AI driven eco analytics to regenerative campus designs that promise to redefine sustainability education in the coming decade This edited volume is intended for educators administrators policymakers curriculum developers and all who believe that education must rise to meet the imperatives of climate resilience and social justice By weaving together scholarship praxis and visionary design *Ecologies of Learning* offers a roadmap for transforming classrooms into living ecosystems of inquiry action and regeneration We hope these chapters inspire you to cultivate learning environments where knowledge and innovation converge to heal restore and safeguard our shared planet Editors Dr Divya Sharma Dr Shalini Verma Dr Sumita Singh *Advances in Engineering Education in the Middle East and North Africa* Mahmoud Abdulwahed,Mazen O. Hasna,Jeffrey E. Froyd,2015-11-18 This book provides a collection of the latest advances in engineering education in the Middle East and North Africa MENA region and sheds insights for future development It is one of the first books to address the lack of comprehensive literature on undergraduate engineering curricula and stimulates intellectual and critical discourse on the next wave of engineering innovation and education in the MENA region The authors look at recent innovations through the lens of four topics learning and teaching curriculum development assessment and accreditation and challenges and sustainability They also include analyses of pedagogical innovations models for transforming engineering education and methods for using technological innovations to enhance active learning Engineering education topics on issues such as construction health and safety urban design and environmental engineering in the context of the MENA region are covered in further detail The book concludes with practical recommendations for implementations in engineering education This is an ideal book for engineering education academics engineering curriculum developers and accreditation specialists and deans and leaders in engineering education *Innovations in Flipping the Language Classroom* Jeffrey Mehring,Adrian Leis,2017-12-04 This book provides advice on flipping from a vast range of topics related to second and foreign language teaching such as assessment pronunciation speaking listening reading writing and content based language teaching Based on insights from other professionals in the field it helps teachers of English as a foreign language better understand the idea of a flipped classroom The book provides examples for teachers who wish to start flipping their own classes and additional ideas for those who are already flipping **Meaningful Assessment in Interdisciplinary Education** Ilja Boor,Debby Gerritsen,Linda Greef,Jessica Rodermans,2025-10-01 Today s university lecturers are faced with the challenge of educating students to see beyond the limits of their own discipline and to come up with innovative solutions to societal challenges Many

lecturers would like to put more emphasis on teaching students how to integrate diverse forms of knowledge work together in teams critically reflect and become self regulated learners These lecturers are breaking down the silos of scientific disciplines as well as the barriers between academia and society and responding to the changing role of universities in society Just as teaching and learning are ready for change so is assessment In this book the authors call for an assessment strategy with a greater emphasis on assessment for and assessment as learning with a focus on giving powerful feedback and the use of authentic assessment tasks as well as alignment with the intended learning outcomes and your pedagogical beliefs If you are looking for ways to assess integration collaboration reflection and critical thinking rather than only assessing the acquisition of knowledge the examples in this handbook are inspiring initiatives that can point you to new directions in assessment
