Streaming Music Sofia Johansson, Ann Werner, Patrik Åker, Greg Goldenzwaig, 2017-08-24 Streaming Music examines how the Internet has become integrated in contemporary music use by focusing on streaming as a practice and a technology for music consumption The backdrop to this enquiry is the digitization of society and culture where the music industry has undergone profound disruptions and where music streaming has altered listening modes and meanings of music in everyday life The objective of Streaming Music is to shed light on what these transformations mean for listeners by looking at their adaptation in specific cultural contexts but also by considering how online music platforms and streaming services guide music listeners in specific ways Drawing on case studies from Moscow and Stockholm and providing analysis of Spotify VK and YouTube as popular but distinct sites for music Streaming Music discusses through a qualitative cross cultural study questions around music and value music sharing modes of engaging with music and the way that contemporary music listening is increasingly part of mobile automated and computational processes Offering a nuanced perspective on these issues it adds to research about music and digital media shedding new light on music cultures as they appear today As such this volume will appeal to scholars of media sociology and music with interests in digital technologies

You Have Not Yet Heard Your Favourite Song Glenn McDonald, 2024-06-20 If you want to know anything about how music surfaces today how to find it or how to create it you will find what you need right here Joseph Menn Washington Post writer For the first time in history almost every song ever recorded is available instantly Everywhere This book charts what music s dazzling digital revolution really means for fans and artists As a former data guru at the world s biggest streaming service Spotify Glenn McDonald reveals What the tech giants know about you How they serve up your next song Whether fans can cheat the algorithm Whether jazz is dead and ASMR is the new punk Your chances of becoming a rock star Having analysed the streams of 500 million people McDonald explores what the data tells us about music and about ourselves from the secrets of russel ter in Norway to Christmas in the Philippines Statistically you have not yet heard your lifetime s favourite song This book will take you on a voyage of discovery

through music's fast flowing new waters 10 bonus playlists of wonder included About the Author Glenn McDonald is expertly placed to provide a comprehensive picture of the global music industry in the 2020s Growing up in 1980s and 1990s America he was an obsessive collector of physical music CDs and vinyl albums But he soon realised the revolutionary power of digital media to make songs more widely accessible He started doing data work at the US music intelligence startup The Echo Nest which was soon acquired by Spotify He became Spotify's Data Alchemist His website Every Noise at Once everynoise.com is an unprecedented computational map of the world's music genres Reviews If you want to know anything about how music surfaces today how to find it or how to create it you will find what you need right here And you will be highly entertained and amused in the process Joseph Menn Washington Post staff writer and author of All the Rage The Rise and Fall of Shawn Fanning's Napster We used to sell CDs by the weight of pallets thanks to streaming we know how our content is consumed In this immersive book Glenn has demonstrated what we can do with this knowledge so other industries facing their Napster Moment can learn from his unrivalled first mover advantage Will Page author of Pivot and former Chief Economist of Spotify I'd say that reading this book is the next best thing to having an in depth impassioned hours long fika with Glenn McDonald about music and culture and all of the most burning topics of our time but I'd be lying It's even better This book is a true behind the scenes examination of our culture and our industry from the perspective of someone who was in the thick of it from the beginning It's a history of the streaming era written by someone who made history in the streaming era Meg Tarquinio PhD Spotify Twitch Netzwerk Music Group Throughout McDonald's book personal anecdotes and his own love of music spill out in witty conversational prose Even chapters that delve into streaming's complex finances unsurprisingly your 15 monthly fee does not go directly to your favourite artist but is split between that month's most streamed meaning that megastars such as Swift and Ed Sheeran stay at the top of the pyramid are told in layman's terms Poppie Platt The Daily Telegraph Extract CHAPTER 9 MERCENARIES AND FAN ARMIES Where there's an economic system there's probably fraud This is not a proud truth to admit about humanity but it seems to me to have been consistently historically true Money is supposed to be a bookkeeping mechanism but it becomes a goal Fraud and cheating existed in the music business like any business long before streaming happened Back when charts were based on people reporting sales numbers on phone calls those people could be bribed to say different numbers Radio DJs could be paid to pretend they were playing a song more because they just liked it Accounting could be manipulated Streaming doesn't necessarily make cheating easier overall but it definitely makes it more accessible to introverts Instead of making phone calls you can write computer programs that pretend to be streaming music listeners Piracy maintains a certain dastardly allure Streaming music fraud is not to be brutally honest the most glamorous or profitable form of dastrardry Streaming rewards accumulate in tiny micro transactions and the software necessary to laboriously accumulate micro royalties illegitimately isn't any easier to write than legal software for which you can get paid normal salaries It only really scales if you become a service provider selling fraud as a

service and then you're a business with business problems instead of a pirate with a rakish eye patch and the sea air in your hair. If you want to cheat your way to riches you're better off trying to do it in junk stocks or cryptocurrencies where there's way too much money sloshing around and the distinction between legitimate behavior and cheating is fuzzy. So you might have thought that fraud wouldn't be a big issue in streaming. Buy the book and carry on reading.

Chicago Top 40 Charts 1960-1969 Ron Smith,2001-08-01 We Americans love to rank things Whether it s the top television programs or movies at the box office we have a burning desire to know when something is number one Music is no exception Music charts have been around as long as recorded music and radio programs from Your Hit Parade to American Top 40 have capitalized on the idea of counting down the day s top hits It is said that the first printed radio survey of the current top tunes was the WIND Top 21 in Chicago Whether that s true is irrelevant Because of it Chicagoans got into the habit of picking up a list of the latest hits at their local record stores When ABC bought WLS The Prairie Farmer Station in 1960 and switched it to the fledgling top 40 format it soon followed with the Silver Dollar Survey of Chicago s top 40 tunes For over 30 years WLS and its FM successor WYTZ kept the surveys going each week And with its 50 000 watt clear channel signal and enormous respect in the industry to be listed on WLS survey was perhaps more of an honor than to appear on the national Billboard Hot 100 Chicago Top 40 Charts 1960 1969 documents those songs that dominated the Midwestern airwaves during that decade considered by many to be top 40 s golden age Many of the songs listed did not appear at all on the national charts Others including local acts fared much better in Chicago than in the rest of the country Chicago Top 40 Charts 1960 1969 contains an alphabetical listing by title and by artist of every tune listed on the WLS Silver Dollar Surveys during those years It also lists the top 40 songs of each year and for the entire decade as well as a supplemental listing of songs on the station s Rhythm and Blues chart of 1964 For those who grew up listening to radio in the Windy City as well as for record collectors from anywhere Chicago Top 40 Charts 1960 1969 will be a valued addition to any music reference library

Platforms, Promotion, and Product Discovery Luis Aguiar (Research fellow),Joel Waldfogel,2018 Digitization has vastly increased the amount of new music produced and available directly to consumers While this has levelled the playing field between already prominent and new artists creators may now be dependent on platform decisions about which songs and artist to promote With Spotify emerging as a major interactive streaming platform this paper explores the effect of Spotify s playlists on both the promotion of songs and the discovery of music by new artists using four approaches First we examine songs streaming volumes before and after their

addition to and removal from major global playlists Second we compare streaming volumes for songs just on and just off algorithmic top 50 playlists Third we make use of cross country differences in inclusion on New Music Friday lists using song fixed effects to explain differences in streaming Fourth we develop an instrumental variables approach to explaining cross country New Music Friday rank differentials based on home bias Being added to Today s Top Hits a list with 18.5 million followers during the sample period raises streams by almost 20 million and is worth between 116 000 and 163 000 Inclusion on New Music Friday lists substantially raises the probability of song success including for new artists

Evaluation and Credentialing in Digital Music Communities H. Cecilia Suhr, 2014-11-07 In this MacArthur Report Suhr explores digital music communities use of evaluation games and digital badges for both casual music evaluators and musicians The first case study focuses on audience evaluation via playing Spotify s Hit or Not game where game players evaluate a song s hit potential Suhr explores the gamification of learning and evaluation when the act of music evaluation turns into a game what do the players learn and what may be the implications of this type of evaluation The second more in depth case study on Indaba Music examines the process of gaining badges through involvement in contests Suhr questions whether or not gaining badges holds significance for musicians Taken as a whole this report analyzes how digital badges are perceived by both music listeners and musicians To what extent can digital badges be an effective way to represent and credit musicians accomplishments and merits What are the emerging challenges benefits and shortcomings in the use of digital badges as an alternative evaluation mechanism How do the uses of digital badges in the context of assessing creativity intersect or diverge with the practices related to education and other non creative fields Provided by publisher
