Ethical Research With Children Untold Narratives And Taboos:

Ethical Research with Children Sarah Richards, Jessica Clark, Allison Boggis, 2015-10-26 An increasing interest in children's lives has tested the ethical and practical limits of research. Rather than making tricky ethical decisions transparent, researchers tend to gloss over stories that do not fit with sanitized narratives. This book aims to fill this gap by making explicit the lived experiences of research with children. *Ethics and Integrity in Research with Children and Young People* Grace Spencer, 2021-11-04 This international and multi-disciplinary edited collection unpacks some of the ethical complexities of conducting research with children and young people. The chapters in the volume offer an applied perspective to navigating contemporary and complicated ethical issues that can arise in the field of childhood and youth-centred research.

Researching Children and Childhoods Sarah Richards, Sarah Coombs, 2025-07-10 Junior researchers in the field of childhood studies are often faced with many challenges that accompany research with young participants. Methodological concepts such as research relationships, positionality, self-disclosure, and reflexivity can sometimes become subordinate to more practical and procedural concerns. *Researching Children and Childhoods* frames these themes not as problems but as opportunities to deepen and strengthen research discussions and analysis. Providing students with a guide to support their ventures into research with children and young people, this book offers practical advice on writing a thesis/dissertation and will enable readers to confidently reflect on the ethical issues embedded in their own projects and recognise them as opportunities for discussion within their dissertations or theses. *Researching Children and Childhoods* demystifies the role of methodologies and positions them as essential tools for their research. Consider the efficacy of concepts such as agency, autonomy, participation, subjectivity, and voice as ways of understanding childhood and children's lived experiences. Use ideas such as positionality, self-disclosure, and category entitlement to recognise the integral role of researcher identity and relationships in the construction of knowledge. Use I authoritatively when writing about their own research without reducing content to descriptive opinion-based discussions. Situate their research by exploring the context in which the research takes place and the power relations embedded within participants and researcher relationships. Each chapter includes a variety of researcher experiences, vignette examples, and specific activities aimed at applying the key themes represented in this volume into research dissertations. *Researching Children and Youth* Ingrid E. Castro, Melissa Swauger, Brent Harger, 2017-03-17 This volume seeks to directly address the problems and pitfalls that often accompany researching children and youth in today's society. This volume addresses participatory and feminist ethnographic approaches, digital mining, children's agency, and navigating IRBs. Themes of space, location, and identity run throughout this volume. Understanding Children's Informal Learning Roseanna Bourke, John O'Neill, Judith Loveridge, 2024-02-19 Learning and personal development are integral to being a person, and learning and teaching are integral to life as a social being. *Understanding Children's Informal Learning* presents children's informal learning out of school and explores how this knowledge can enhance teaching and learning practice in the
