Ethno Architecture Politics Migration Architect Lozanovska:

Ethno-Architecture and the Politics of Migration Mirjana Lozanovska, 2015-12-22 *Ethno Architecture and the Politics of Migration* explores the interface between migration and architecture. Cities have been substantially affected by transnational migration but the physical manifestations of migration in architecture and its effect on streetscape, neighbourhood and city have so far been understudied. This contributed volume examines how migrants interact with and adapt and construct new architecture. Looking at the physical urban and cultural impact of these changes on a variety of sites, the authors explore architecture as an identity category and investigate what buildings and places associated with migration tell us about central questions of belonging, culture, community and home in regions such as North America, Australia and the UK. An important contribution to debates on place identity and the transformation of places as a result of mobility and globalised economies in the 21st century.

Migrant Housing Mirjana Lozanovska, 2019-03-01 *Migrant Housing* the latest book by author Mirjana Lozanovska examines the house as the architectural construct in the processes of migration. Housing is pivotal to any migration story with studies showing that migrant participation in the adaptation or building of houses provides symbolic materiality of belonging and the platform for agency and productivity in the broader context of the immigrant city. Migration also disrupts the cohesion of everyday dwelling and homeland integral to housing and the book examines this displacement of dwelling and its effect on migrant housing. This timely volume investigates the poetic and political resonance between migration and architecture, challenging the idea of the house as a singular theoretical construct. Divided into three parts: Histories and theories of post war migrant housing; House, home and Mapping migrant spaces of home, it draws on data studies from Australia and Macedonia with literature from Canada, Sweden and Germany to uncover the effects of unprivileged post war migration in the late twentieth century on the house as architectural and normative model and from this perspective negotiates the disciplinary boundaries of architecture.
