Michal Rosen-Zvi

Euclid In The Rainforest Discovering Universal Truth In Logic And Math:

Euclid in the Rainforest Joseph Mazur, 2006-07-25 Like Douglas Hofstadter's Godel Escher Bach and David Berlinski's A Tour of the Calculus Euclid in the Rainforest combines the literary with the mathematical to explore logic the one indispensable tool in man's quest to understand the world Underpinning both math and science it is the foundation of every major advancement in knowledge since the time of the ancient Greeks Through adventure stories and historical narratives populated with a rich and quirky cast of characters Mazur artfully reveals the less than airtight nature of logic and the muddled relationship between math and the real world Ultimately Mazur argues logical reasoning is not purely robotic At its most basic level it is a creative process guided by our intuitions and beliefs about the world **Zeno's Paradox** Joseph

Mazur, 2008-03-25 The fascinating story of an ancient riddle and what it reveals about the nature of time and space Three millennia ago the Greek philosopher Zeno constructed a series of logical paradoxes to prove that motion is impossible Today these paradoxes remain on the cutting edge of our investigations into the fabric of space and time Zeno's Paradox uses the motion paradox as a jumping off point for an exploration of the twenty five hundred year quest to uncover the true nature of the universe From Galileo to Einstein to Stephen Hawking some of the greatest minds in history have tackled the problem and made spectacular breakthroughs but through it all the paradox of motion remains **Euclid in the Rainforest** Joseph Mazur, 2006-07-25 Like Douglas Hofstadter's Godel Escher Bach and David Berlinski's A Tour of the Calculus Euclid in the Rainforest combines the literary with the mathematical to explore logic the one indispensable tool in man's quest to understand the world Through adventure stories and historical narratives populated with a rich and quirky cast of characters Mazur artfully reveals the less than airtight nature of logic and the muddled relationship between maths and the real world

Abraham Lincoln and the Structure of Reason David Hirsch, Dan Van Haften, 2010-11-19 The secrets of one of history's greatest orators are revealed in one of the most stunningly original works on Abraham Lincoln to appear in years John Stauffer professor of English and history Harvard University For more than 150 years historians have speculated about what made Abraham Lincoln truly great How did Lincoln create his compelling arguments his convincing oratory and his unforgettable writing Some point to Lincoln's study of grammar literature and poetry Others believe it was the deep national crisis that gave import to his words Most agree that he honed his persuasive technique in his work as an Illinois attorney Here the authors argue that it was Lincoln's in depth study of geometry that made the president's verbal structure so effective In fact as the authors demonstrate Lincoln embedded the ancient structure of geometric proof into the Gettysburg Address the Cooper Union speech the first and second inaugurals his legal practice and much of his substantive post 1853 communication Also included are Lincoln's preparatory notes and drafts of some of his most famous speeches as well as his revisions and personal thoughts on public speaking and grammar With in depth research and provocative insight Abraham Lincoln and the Structure of Reason offers a whole new angle on Lincoln's brilliance James M Cornelius Curator Lincoln

Collection Abraham Lincoln Presidential Library and Museum *The Personality of Math* Paul A. Wagner, Frank Fair, 2022-06-06 If our goal is to broaden and deepen students awareness and understanding of mathematics we advance the idea that engaging students with what we metaphorically call the personality of math That is we think that students who engage with the math s 1 human champions 2 with its history and philosophy and 3 with the nature of its problems and inferential challenges are more likely to have a positive attitude toward math that will encourage greater learning

Literacy and Learning in the Content Areas Sharon Kane, 2018-09-19 The Fourth Edition of Literacy and Learning in the Content Areas Enhancing Knowledge in the Disciplines provides readers with the knowledge motivation tools and confidence for integrating literacy in their disciplinary classrooms Offering an original literature based approach to teaching disciplinary literacy the new edition shares important ways in which teachers of courses in the disciplines can enhance student learning of subject matter and skills while also fostering their growth in the many facets of literacy Throughout each chapter Kane provides engaging and creative strategies and activities to make literacy come alive in discipline specific courses and to encourage students to explore and learn in the classroom Embedded in each chapter are examples resources and strategies to help readers actively engage with and implement literacy practices These features include Teaching in Action examples by subject area Activating Prior Knowledge activities to stimulate critical thinking to prepare readers to learn complex theoretical and conceptual material about teaching learning and literacy and end of chapter Application Activities to apply field experiences to classroom use New to the Fourth Edition Every chapter of this new edition is updated to reflect the current approaches standards and benchmarks for discipline specific literacy Enhanced Companion Website with BookTalks to introduce relevant books in many genres and subjects encouraging readers to explore the books for themselves and providing a model for BookTalks in their own classrooms Expanded practical instructional strategies for teaching literacy in math science and social studies Updated to include newly published titles in children s literature young adult literature and nonfiction Great Circles Emily Rolfe Grosholz, 2018-11-13 This volume explores the interaction of poetry and mathematics by looking at analogies that link them The form that distinguishes poetry from prose has mathematical structure lifting language above the flow of time as do the thoughtful ways in which poets bring the infinite into relation with the finite The history of mathematics exhibits a dramatic narrative inspired by a kind of troping as metaphor opens metonymy and synecdoche elaborate and irony closes off or shifts the growth of mathematical knowledge The first part of the book is autobiographical following the author through her discovery of these analogies revealed by music architecture science fiction philosophy and the study of mathematics and poetry The second part focuses on geometry the circle and square launching us from Shakespeare to Housman from Euclid to Leibniz The third part explores the study of dynamics inertial motion and transcendental functions from Descartes to Newton and in 20th c poetry The final part contemplates infinity as it emerges in modern set theory and topology and in contemporary poems including narrative poems

about modern cosmology The Mathematics Teacher ,2005 Proceedings and Addresses of the American Philosophical Association American Philosophical Association,2006 List of members in v 1 Reports of the President and the Treasurer John Simon Guggenheim Memorial Foundation,2006 Includes biographies of fellows appointed reappointments publications musical compositions academic appointments and index of fellows **Issues in Science and Technology** ,2006
