Ethical Sourcing In The Global Food System:

Ethical Sourcing in the Global Food System Stephanie Barrientos, 2012-04-27 Ethical sourcing both through fair trade and ethical trade is increasingly entering the mainstream of food retailing Large supermarkets have come under pressure to improve the returns to small producers and conditions of employment within their supply chains But how effective is ethical sourcing Can it genuinely address the problems facing workers and producers in the global food system Is it a new form of northern protectionism or can southern initiatives be developed to create a more sustainable approach to ethical sourcing How can the rights and participation of workers and small producers be enhanced given the power and dominance of large supermarkets within the global food chain What role can civil society and multistakeholder initiatives play in ensuring the effectiveness of ethical sourcing This book brings together a range of academics and practitioners working on issues of ethical sourcing in the global food system It critically explores the opportunities and challenges in the ethical sourcing of food by combining analysis and case studies that examine a range of approaches It explores whether ethical sourcing is a cosmetic northern initiative or can genuinely help to improve the conditions of small producers and workers in the current global food system *Reconciling Human Existence with Ecological Integrity* Laura Westra, Klaus Bosselmann, Richard Westra, 2012-05-16 The ecological challenge demands a paradigm shift in our thinking about the human environment relation *Reconciling Human Existence with Ecological Integrity* provides a state of the art account of work on ecological integrity and offers a compelling vision for the future Derek Bell Senior Lecturer at the School of Geography Politics and Sociology University of Newcastle A book of vast scope and richness If policymakers around the world took notice of this insightful set of messages we would all live with greater happiness health and wellbeing with a brighter future for our children and grandchildren Lawrence O Gostin O Neill Professor of Global Health Law Georgetown University Law Center This book attempts to do in theory what the world needs to do in practice It is an ecological master plan that shows how we can not only survive but also flourish James P Sterba President of the American Philosophical Association Central Division Ecosystems have been compared to a house of cards remove or damage a part and you risk destroying or fundamentally and irreversibly altering the whole Protecting ecological integrity means maintaining that whole an aim which is increasingly difficult to achieve given the ever growing dominance of humanity This book is the definitive examination of the state of the field now and the way things may and must develop in the future Written and edited by members of the Global Ecological Integrity Group an international collection of the worlds most respected authorities in the area the book considers the extent to which human rights such as the rights to food energy health clean air or water can be reconciled with the principles of ecological integrity The issue is approached from a variety of economic legal ethical and ecological standpoints providing an essential resource for researchers students and those in government or business in a wide range of disciplines **The New Peasantries** Jan Douwe van der Ploeg, 2012-05-23 This book explores the position role and

significance of the peasantry in an era of globalization particularly of the agrarian markets and food industries It argues that the peasant condition is characterized by a struggle for autonomy that finds expression in the creation and development of a self governed resource base and associated forms of sustainable development In this respect the peasant mode of farming fundamentally differs from entrepreneurial and corporate ways of farming The author demonstrates that the peasantries are far from waning Instead both industrialized and developing countries are witnessing complex and richly chequered processes of re peasantization with peasants now numbering over a billion worldwide The author s arguments are based on three longitudinal studies in Peru Italy and The Netherlands that span 30 years and provide original and thought provoking insights into rural and agrarian development processes The book combines and integrates different bodies of literature the rich traditions of peasant studies development sociology rural sociology neo institutional economics and the recently emerging debates on Empire

The Principles of Sustainability Simon Dresner, 2008 At a time of increasingly rapid environmental deterioration and climate change sustainability is one of the most important issues facing the world Can we create a sustainable society What would that mean How should we set about doing it How can we bring about such a profound change in the way things are organized This text tackles these questions directly It covers historical development of the concept of sustainability contemporary debates about how to achieve it and obstacles and the prospects for overcoming them This new fully revised edition covers the latest on the climate change front particularly the advances in scientific understanding and political awareness of climate change Other updates include more recent economic analyses particularly the Stern Report and the global shift away from faith in markets over the past five years
