Ethnopolitics In Cyberspace Ethnopolitics In Cyberspace:

Ethnopolitics in Cyberspace Robert A. Saunders, 2010-12-28 Defying predictions that the Internet would eventually create a world where nations disappeared in favor of a unified global village the new millennium has instead seen a proliferation of nationalism on the Web Cyberspace a vast digital terrain built upon interwoven congeries of data and sustained through countless public private communication networks has even begun to alter the very fabric of national identity This is particularly true among stateless nations diasporic groups and national minorities which have fashioned the Internet into a shield against the assimilating efforts of their countries of residence As a deterritorialized medium that allows both selective consumption and inexpensive production of news and information the Internet has endowed a new generation of technology savvy elites with a level of influence that would have been impossible to obtain a decade ago Challenged nations from Assyrians to Zapotecs have used the Web to rewrite history engage in political activism and reinvigorate moribund languages This book explores the role of the Internet in shaping ethnopolitics and sustaining national identity among four different national groups Albanians outside of Albania Russians in the near abroad Roma Gypsies and European Muslims Accompanying these case studies are briefer discussions of dozens of other online national movements as well as the ramifications of Internet nationalism for offline domestic and global politics The author discusses how the Internet provides new tools for maintaining national identity and improves older techniques of nationalist resistance for minorities Bringing together research and methodologies from a range of fields Saunders fills a gap in the social science literature on the Internet's central role in influencing nationalism in the twenty first century By creating new spaces for political discourse alternative avenues for cultural production and novel means of social organization the Web is remaking what it means to be part of nation This insightful study provides a glimpse of this exciting and sometimes disturbing new landscape **We Are All Targets** Matt Potter, 2023-01-10 The incredible untold origin story of cyberwar and the hackers who unleashed it on the world tracing their journey from the ashes of the Cold War to the criminal underworld governments and even Silicon Valley Two years before 9 11 the United States was attacked by an unknown enemy No advance warning was given and it didn't target civilians Instead tomahawk missiles started missing their targets US agents were swept up by hostile governments and America's enemies seemed to know its every move in advance A new phase of warfare cyber war had arrived And within two decades it escaped Pandora's Box plunging us into a state of total war where every day countless cyber attacks perpetrated by states and mercenaries are reshaping the world After receiving an anonymous email with leaked NATO battle plans during the bombardment of Kosovo journalist Matt Potter embarked on a twenty year investigation into the origins of cyber war and how it came to dominate the world He uncovered its beginnings worthy of a Bond movie in the last days of the Cold War as the US and its allies empowered a generation of Eastern European hackers only to wake up in the late 90s to a new world order It's a story that winds through Balkan hacking culture Russia Silicon Valley and the Pentagon introducing us to

characters like a celebrity hacker with missing fingers who keeps escaping prison FBI agents chasing the first generation of cyber mercenaries in the 90s tech CEOs and Russian generals obsessed with a Cold War rematch Never before told this is the riveting secret history of cyberwar not as governments want it to be controlled military directed discreet and sophisticated but as it really is anarchic chaotic dangerous and often thrilling **Cyber Peace** Scott J.
