The Making of Eurasia Moritz Pieper,2021-09-09 The Making of Eurasia investigates the multi layered spectrum of China and Russia s Eurasian policies towards each other ranging from competition to cooperation as well as the role of regional actors in between The book examines the impact of and responses to the dynamic Sino Russian interaction in the wake of China s Belt and Road initiative focusing on the selected case studies of Kazakhstan Mongolia and Uzbekistan but also on inter regional implications across the Eurasian space With China s imprint on inter regional politics and ambition to make a distinctive Chinese contribution to globalization and Russia s vision of a Greater Eurasia in which Moscow stakes out a place for itself as an indispensable power other regional actors adopt policies that respond to and co shape the resulting centrifugal forces Meanwhile power shifts are underway on a global plane as the normative divide between Russia and the West has widened and as the Sino American rivalry is intensifying The book therefore also sheds light on the effects of Eurasian power shifts on global governance in a context where global leadership is contested and in which the US and Europe are re defining their relationship not only towards a self confident China but also towards each other As such this study will provide valuable insight for students and scholars of Eurasian Asia Studies Foreign Policy Analysis and International Relations at large

The Elgar Companion to the Eurasian Economic Union Alexander Libman,Evgeny Vinokurov,2024-03-14 This insightful Companion provides an in depth systematic analysis of the Eurasian Economic Union EAEU an economic

union of several post Soviet Eurasian states Eurasian Integration - the View from Within Piotr Dutkiewicz, 2015 As Eurasia and the adjacent territories become more important to the world there is increasing interest from international powers accompanied by attempts to give institutional form to traditional economic and security links within the region This book includes a range of substantive work from scholars based in the region offering contrasting perspectives on the process of Eurasian integration and its place in the world Chapters consider economic political social and security developments with notable studies of the major countries involved in the development of the Eurasian Economic Union The work also examines the connections between the region and China greater Asia and the European Union It outlines the varying dynamics with populations growing in Central Asia while at best stagnant elsewhere The book discusses the increasing strategic significance of the region and explores how the new post Soviet states are growing in national cohesion and political self confidence Above all the book examines the concept of Eurasia outlining the debates about the concept and how various aspects of the legacy of Eurasianism contribute to contemporary plans for integration The book argues that although regional integration is very much a popular idea in our age with the potential for economic benefits and increased international influence in practice contemporary projects for Eurasian integration have been highly ambiguous and contested Nevertheless significant steps have been taken towards the creation of the Eurasian Economic Union The book analyses developments to date noting the achievements as well as the challenges Eurasian Regionalisms and Russian Foreign Policy Mr Mikhail A Molchanov, 2015-05-28 Bridging foreign policy analysis and international political economy this volume offers a new look at the problem of agency in comparative regional integration studies It examines evolving regional integration projects in the Eurasian space defined as the former Soviet Union countries and China and the impact that Russian foreign policy has had on integration in the region Mikhail Molchanov argues that new regionalism in Eurasia should be seen as a reactive response to contemporary challenges that these developing states face in the era of globalization Regional integration in this part of the world treads the unknown waters and may not simply repeat the early steps in the evolution of the European Union The question of a hegemonic leadership in particular as exercised by a country that spearheads regional integration efforts animates much of the discussion offered in the book Moreover Eurasian regionalisms are plural phenomena because of complementary and competing projects that engage the same or partially overlapping groups of countries By combining foreign policy studies with an examination of the international political economy of regionalism in Eurasia the author furthers our understanding of new regionalism both theoretically and empirically **Super Continent** Kent E. Calder, 2019-04-30 A Eurasian transformation is underway and it flows from China With a geopolitically central location the country's domestic and international policies are poised to change the face of global affairs The Belt and Road Initiative has called attention to a deepening Eurasian continentalism that has argues Kent Calder much more significant implications than have yet been recognized In Super Continent Calder presents a theoretically guided and empirically grounded explanation for these

changes He shows that key inflection points beginning with the Four Modernizations and the collapse of the Soviet Union and culminating in China's response to the Global Financial Crisis and Crimea's annexation are triggering tectonic shifts Furthermore understanding China's emerging regional and global roles involves comprehending two ongoing transformations within China and across Eurasia as a whole and that the two are profoundly interrelated Calder underlines that the geo-economic logic that prevailed across Eurasia before Columbus and that made the Silk Road a central thoroughfare of world affairs for close to two millennia is reasserting itself once again

The Regional World Order

Boglárka Koller, Alexei D.
